W. COLVIN STREET BRIDGE OVER ONONDAGA CREEK REHABILITATION PROJECT

The Syracuse Engineering Dept. will be rehabilitating the W. Colvin Street Bridge over Onondaga Creek in 2021. This is a federally funded Transportation Improvement Program project with oversight by the New York State Dept. of Transportation. LaBella Associates are the design engineers.

This Bridge Project will:

- Extend the bridge's service life
- Reduce the life-cycle maintenance costs
- Improve the overall condition of the structure
- Improve pedestrian and vehicular safety at the structure

Bridge Rehabilitation/Repair will include:

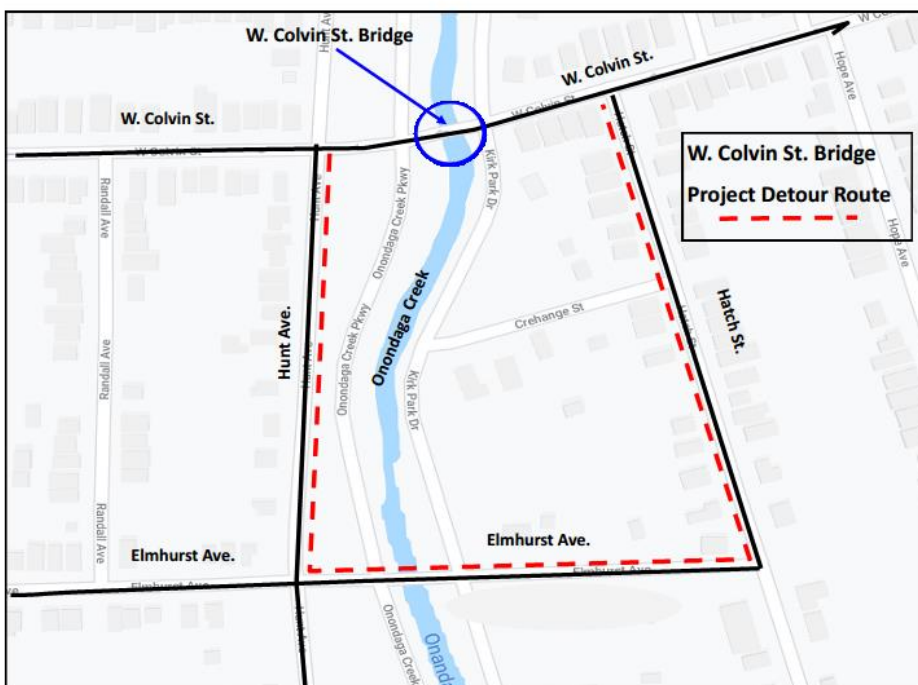

- Repair bridge deck where needed
- Add a new dense deck overlay surface
- Mill and pave the bridge approaches
- Remove and replace existing bridge joints
- Replace the bridge bearings
- Install new bridge curbs
- Replace the bridge railing and fencing
- Replace the approach sidewalks with ADA-compliant sidewalks
- Repair the concrete bank protection
- Paint steel beam ends

Schedule and Funding

Construction is planned for spring through summer 2021. The estimated construction cost is approximately \$650,000 and funded by 95% federal and 5% local sources. Federal workforce employment goals of at least 3.8% minority and 6.9% female workers are required.

Work Zone Safety & Mobility

The bridge will be closed to vehicles during construction. Pedestrian access across the bridge will remain open during construction. The duration of the vehicle closure is expected to be 3-5 months. Vehicles will be detoured 0.5 miles to the Elmhurst Avenue Bridge (see map), requiring one extra travel minute. Detour signs will be posted.

If you have comments, concerns or questions about the project, please mail the comment form or contact:
